

NIF Ontology Collaborators

Neuroscience Ontologies

Other neuroscience groups who are working on ontologies or terminologies for neuroscience in domains not currently covered by NIF. As they are developed, they will be imported into the NIF. If you are developing an ontology for neuroscience, we encourage you to work within the framework so that we don't duplicate effort. We also encourage everyone to join the [Neurolex mailing list](#) to engage the community in discussions about neuroscience ontology issues.

Ontology	Abbrev	Leader	Domain	Status	Notes
Cognitive paradigm ontology	CogPo	Jessica Turner, Angie Laird	Cognitive tests	Under development	
Cognitive phenotypes		Russ Poldrack	Cognitive behaviors	Under development	
Brain Architecture Management System	BAMS	Mihail Bota, Larry Swanson	Rodent neuroanatomy	Under import into NIF	
Neural Electromagnetic ontologies	NEMO	Gwen Frishkoff	EEG, MEG	Under import into NIF
