# 2011-09-09 Power Outage Recovery Info

### As of 1:30pm PDT, if you notice anything not working properly, please submit a ticket via our support website.

There are a few dev and stage systems that still need to be brought online.

Additionally, we are working on getting the CAMERA cylume Rocks cluster, and it's associated systems, including the gama server, back online.

Thank you for your patience through this extraordinary event.

Sincerely,
CRBS SysOps

Please see our status web page for additional details.
